PROFESSIONAL SUMMARY

My interest in data science stems from a natural analytical mindset and a strong belief in the power of data to drive meaningful decisions. During my time at Willamette, I have developed key technical and non-technical skills including coding, data visualization, and the ability to communicate complex insights clearly to non-technical audiences. I also bring a solid foundation in statistical analysis and data pipeline work. I am eager to apply these skills in a role where data directly supports decision-making, and to grow alongside experienced data professionals in a collaborative environment.

TECHNICAL SKILLS

Microsoft Suite (Excel, Word, Powerpoint), Google Suite, R, Python, SQL, Jupyter Notebook, ShinyApp, HubSpot Reporting

RELEVANT EXPERIENCES

SEAL: Willamette University Football Analytics

Salem, OR

Research Assistant to Professor Kristen Gore

August 2024 - May 2025

- Enabled players and coaches to independently explore performance stats by building interactive Shiny dashboard
- Ensured the final product met user needs by partnering with the research team to define and prioritize key features
- Gave coaches season-by-season and game-by-game visibility into opponent metrics through dynamic visualizations

Science Collaborative Research Program

Salem, OR

Research Assistant to Professor Heather Kitada Smalley

January - August 2024

- Validated the central hypothesis by standardizing sensitive American Communities Survey data in Excel
- Streamlined the pipeline by engineering a custom reordering function in R to align data with the survey instrument
- Communicated early research findings to professionals by presenting a poster at the annual ASA Conference

WORK EXPERIENCE

Financial Beginnings

Salem, OR

Data Analytics Intern

May 2026 - August 2026

- Increased company awareness of their data by using data exported from Hubspot to analyze key business metrics
- Improved data integrity and hygiene by providing reviews of the data and proposing areas for improvements
- Collaborated with colleagues from different departments to better understand their use of company data

QUAD Center

Salem, OR

Embedded Tutor and QUAD Supervisor

August 2023 - August 2026

- Increased student comprehension by guiding peers with open-ended questions about course materials and concepts
- Optimized tutoring effectiveness by strategically matching student needs to tutor skill sets
- Promoted to Supervisor in January 2025, leading team meeting and overseeing daily operations of the center
- Authored a Title III federal grant report demonstrating the trends and patterns of tutoring center utilization

EDUCATION

Willamette University | *Master's of Science in Data Science*

Salem, OR | *August 2026*

Cumulative GPA: 4.00/4.00

Relevant Coursework: Data Ethics, Data Engineering, Data Viz, Machine Learning, Data Lakes & Warehouses

Willamette University | *Bachelor's of Science in Data Science*

Salem, OR | *May 2026*

Cumulative GPA: 3.70/4.00

Relevant Coursework: Statistical Engineering, Data Visualization, Machine Learning, Data Management, Data Wrangling
